

WatchMe: User Manual

En kort beskrivning som snabbt introducerar potentiella användare till vad ert program gör

WatchMe is an Android app that will help you remember movies you would like to see in the future. When seeing a poster for an upcoming film, or hearing a friend talking about a great movie you just can't miss, opening up WatchMe and adding the movie won't take you more than a couple of seconds.

WatchMe helps you find the movie you're looking for instantly by auto-completing movie titles from IMDb.com. It also lets you set a date on which you would like to receive a reminding notification for a movie, for example when it enters the theaters. Added movies will be displayed in a list in the applications main view. Other features WatchMe provides are:

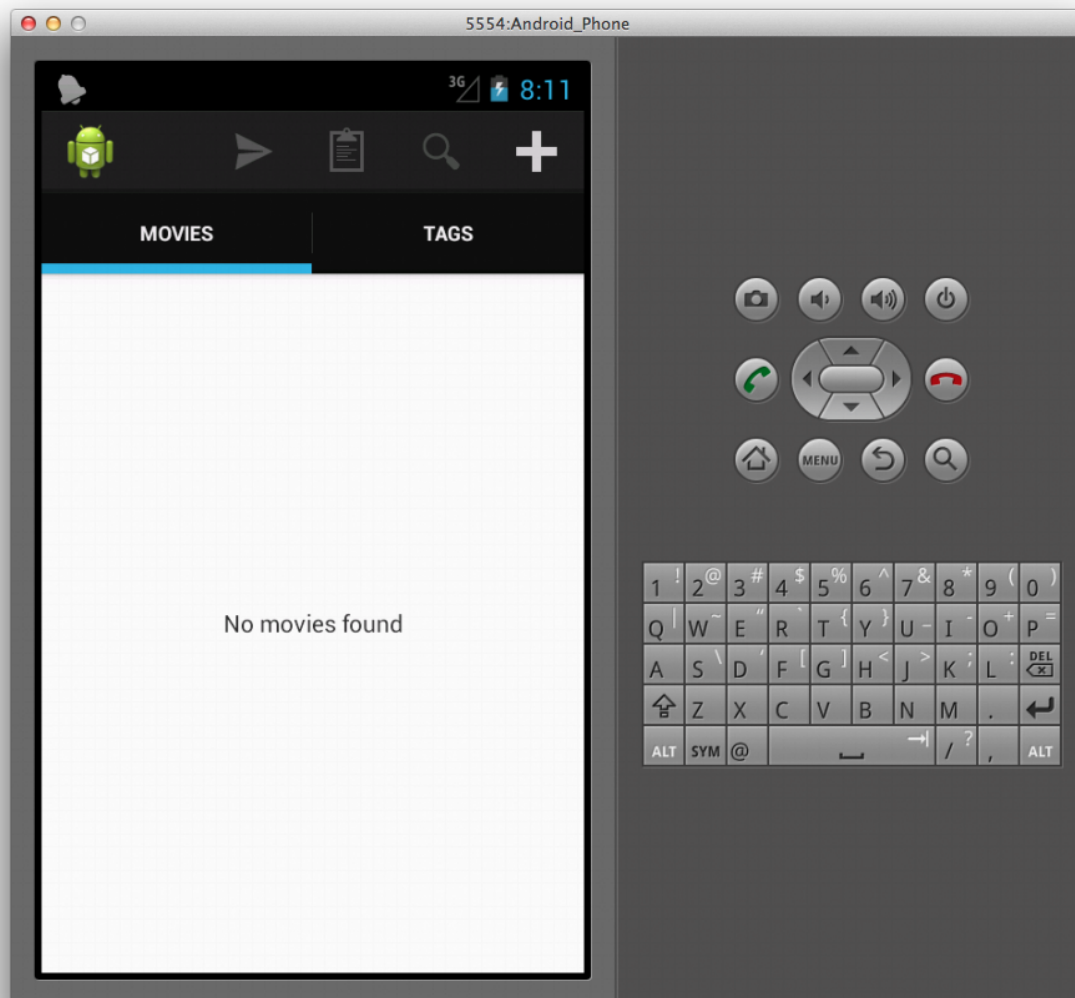

- Categorizing movies by setting tags on them
- E-mailing movie list to friends
- Sorting your list of movies
- Automatically filling movie info such as actors, year, plot, duration, and more

Below you will find a guide that will help you getting started with WatchMe.

Hi, and welcome to WatchMe! This is a guide that will introduce you to the main features of this application.

Manage movies

When you start the app you will see your list of movies. Since this is the first time we use it, no movie has been added, and thus no movies are displayed.

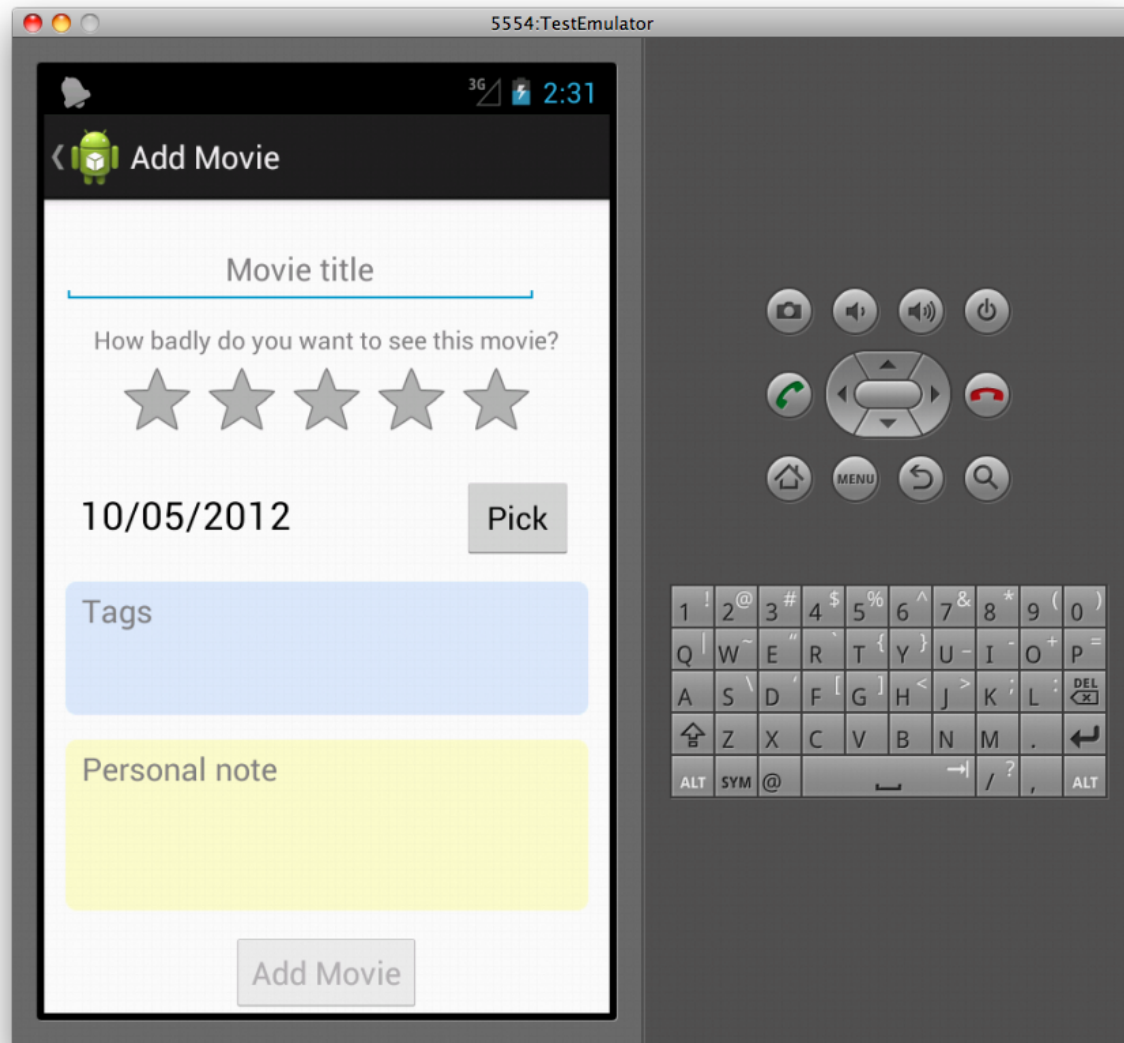

Initial view in WatchMe.

Adding a movie

To add a new movie, press the "+"-button in the top right corner of the screen to get to the "Add movie"-view.

In “Add movie”-view, press the “Movie title” text field to specify the title on the movie you would like to add. If you input some letters, an auto-complete function will kick in to help you.

Use the stars to give the movie a rating describing how badly you want to watch the movie.

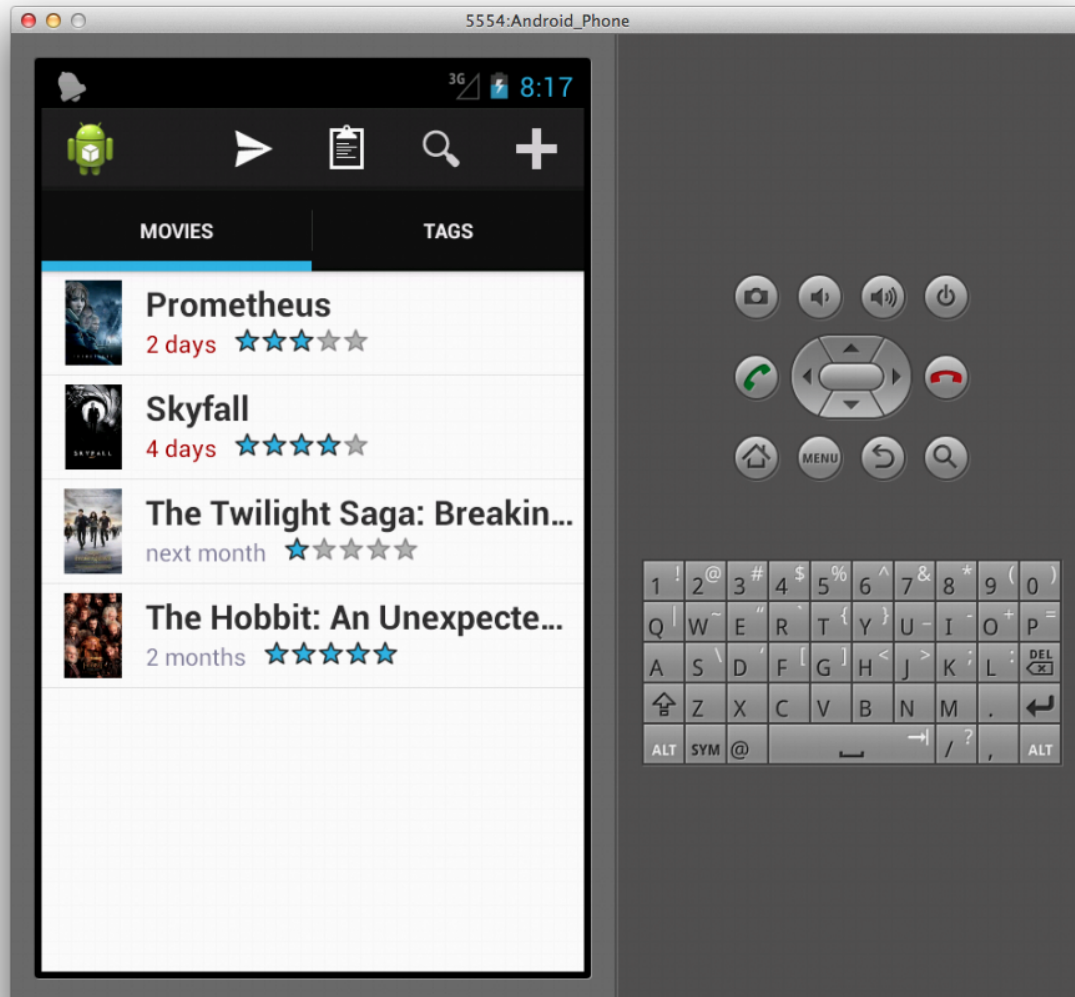

Add movie-view.

Below the stars is a field where you can pick a date. On this date WatchMe will remind you with a notification. The date might be the cinema premiere, the dvd release date, or whatever date you choose.

You are also able to add tags to your movie – these are used to categorize your movies. If you for example add the tag “Action” you will later on be able to view this movie in a list with other “Action” tagged movies.

Last but not least there's a possibility to write a personal note that will be attached to this movie. When you're done, press "Add movie"-button and your movie will be added to your list of movies.

Your movie list after adding some movies.

In your list you will find the newly added movie. When the movie's release date is closing in, you'll see it's color change in order to give you a hint that it's time to start getting excited.

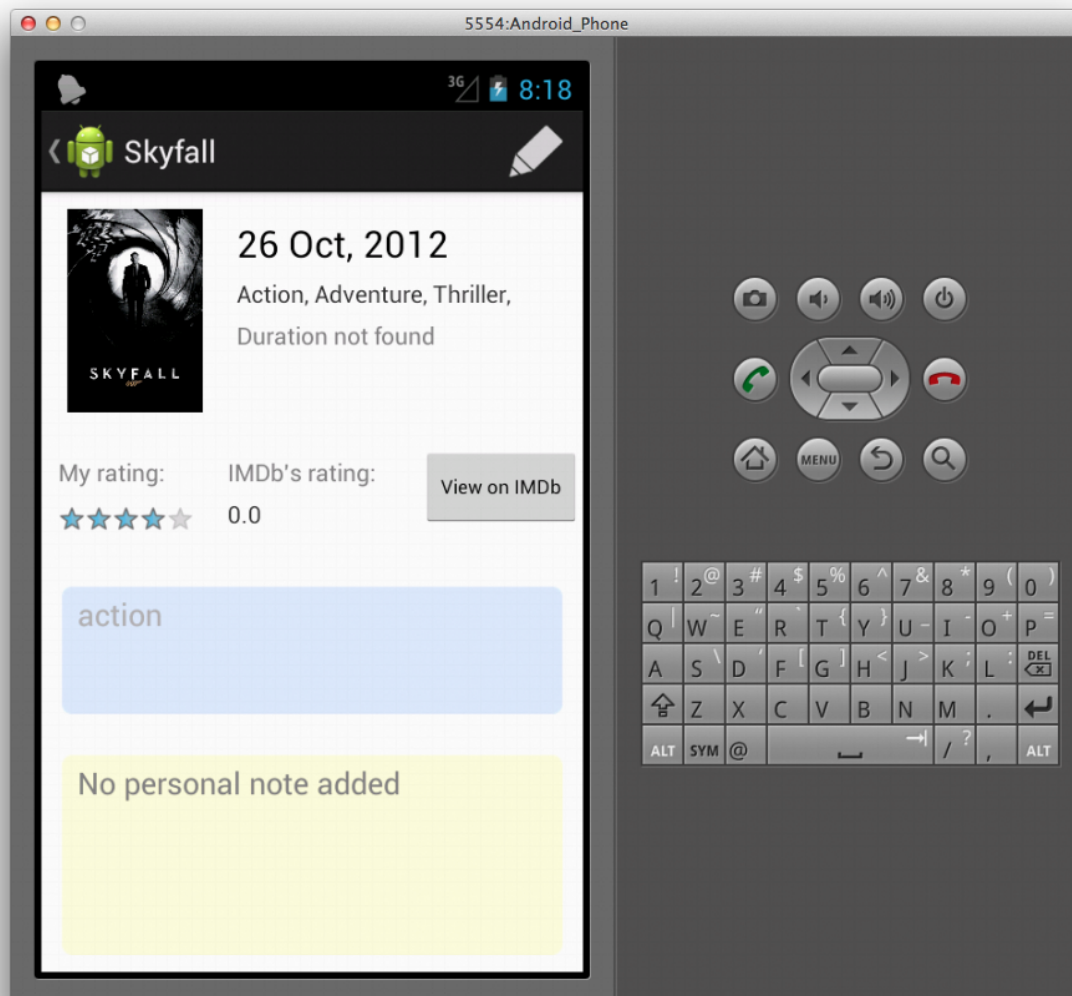

View movie info

If you want to see info about the movie you added, click the movie in the list. This will take you to the movie details view which displays the rating, date, tags and note you previously set on your movie, but also some additional info such as the movies plot, poster, cast, and more, which is fetched from IMDb.com.

Want to see a bigger view of the poster? Just tap it and it will turn up in full screen mode.

Edit Movie

If there's something you would like to change in the info you added, for example add a new tag to your movie, press the "Edit"-button in the top right corner. This will make the fields editable. When you are done, press "Save".

Movie details view.

Delete movie

If you want to delete a movie you've added, perform a "long click" on the movie in the list by pressing and holding it. This will make a dialog pop up, asking you if you're sure you want to delete it. If you're sure, press "Yes".

Get notification for movie

If today is a date that you've selected for a movie, you will get a notification. The bell in the top left corner tells you that you've got a notification. To see it, drag down your "pull-down menu". If you press the notification you will be brought to the details view of the movie the notification concerned.

Organize movies

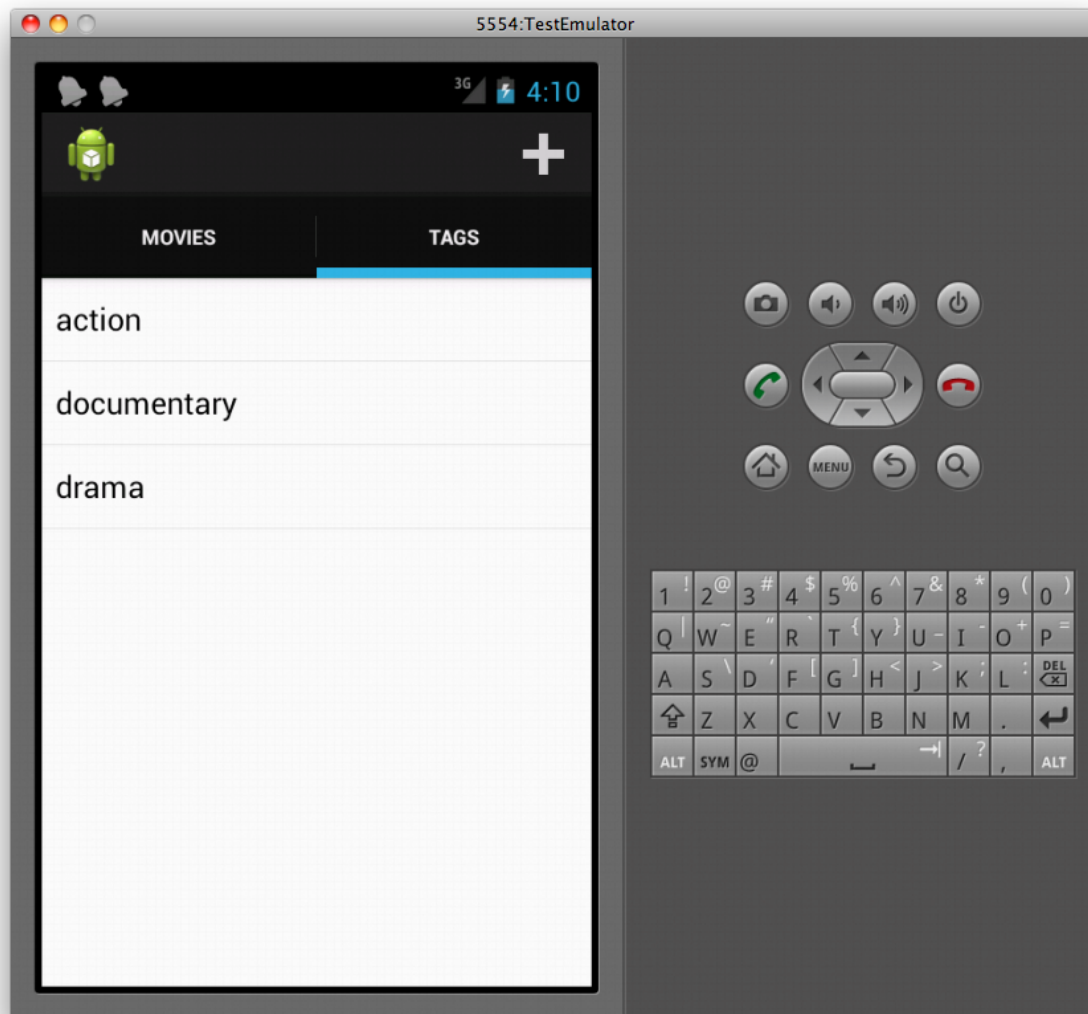

As time goes by more and more movies will be added to WatchMe. This is when WatchMe's organizing features, sorting the movie list and viewing lists of movies with a specific tag, comes in handy.

Sort movies

To sort your list of movies, simply press the button that looks like a note pad in the top of the screen. This will open a dialog that lets you choose between sorting by title, rating or date.

View movies with specific tag

To some of your added movies you might have attached a tag. This is useful if you want to view a list of movies with a specific tag.

List of tags view.

Say for example that you want to view a list of all the action movies you've added. To do this press the "Tags"-tab in the top of the screen. Here you'll find all the tags that's attached to all the movies you've added. To get to a list with the movies that has the action tag, press the text action. When you're done viewing your action movie, press the "home"-button in the top left of the screen which will take you back to your original list of movies.

Search for movies

If you want to perform a free text search on a movie in your movie list, press the magnifying glass in the top of the screen. This will open a text field in which you can put down the text you want to search on. When your done, press the magnifying glass in your keyboard.

Get social

Getting bored adding movies by yourself? Why not share your list of movies with your friends?

E-mail list of movies

To e-mail a list of movies to someone, press the button that looks like a paper plane in the top of the screen. This will bring you to a send message view in which you can put down an address, a message and press send.
