

WatchMe: Release Notes

Bug IDs refer to the story IDs in Pivotal Tracker. References to applicable code commits may be found in the story description and/or comments.

Release 3 (v0.3 Alpha)

2012-10-22

New features

- Searching for movies in the movie list
- Visiting the movie page on IMDb.com from the details view
- When a movie's release date is closing in, the movie's date field changes color in movie list

Changed

- Improved feedback when user tries to add an existing movie
- Dates in movie lists are now shown as relative timestamps
- Items in the Action Bar now has a disabled state

Fixed bugs

- Chosen sorting option isn't selected when accessing the dialog ([#37726303](#))
- Movies should be sorted by descending order ([#37726297](#))
- A passed date can be set on a movie ([#36912951](#))
- Even though a movie cannot be added twice, a notification is still set ([#37252375](#))

Known bugs

- There are inconsistencies in the notifications management: when there are several added movies, the wrong one could open when a notification is chosen ([#38145441](#)).
- When you are in the SearchableActivity you have to press the back button twice before you get back to the main menu. ([#38175435](#))

Release 2 (v0.2 Alpha)

2012-10-14

New features

- A detailed view of each movie is shown when selecting a movie from the list
- Movie details from IMDb are populated when viewing a movie, if that movie was added from the auto-complete dropdown
- A movie's poster (if applicable) is shown in the movie list
- The app now shows a list of all movie tags
 - When selecting a tag, all movies with that tag is shown
 - A tag may be deleted from that list (and therefore from all movies with that tag)
- A movie's rating, date, tags and note can be edited
- The movie list can now be e-mailed (with the movies in the body content)

DAT255

- The movie list can now be sorted by title (default), release date or rating
- A movie's poster (if applicable) can be viewed full screen from the movie detail view
- New action bar icons

Changed

- Moved "Add movie" button in the "Add movie" view to Action bar
- Change date format to "dd MM, YYYY" (ex. "14 Oct, 2012")
- When clicking a notification for a movie, the detail view for the movie is launched.

Fixed bugs

- A half-star rating should not be able to be set ([#36912897](#))
- Ratings are shown as rating bars instead of plain numbers in movie list ([#37726667](#))
- Store movie poster URLs locally instead of fetching from API ([#37497011](#))
- When a movie is added without any tags, an empty tag string isn't set on the movie ([#37253477](#))

Known bugs

- Chosen sorting option isn't selected when accessing the dialog ([#37726303](#))
- Movies should be sorted by descending order ([#37726297](#))
- A passed date can be set on a movie ([#36912951](#))
- Even though a movie cannot be added twice, a notification is still set ([#37252375](#))

Upcoming features

- Search for movies (filter the movie list)

Release 1 (v0.1 Alpha)

2012-10-08

New features

- Add a movie to the list, with a title, release date, rating and a personal note
- Notifications are sent on the chose release date for a movie
- Remove a movie from the list
- Show movie suggestions from IMDb while writing the movie title
- Add tags to a movie

Known bugs

- A passed date can be set on a movie ([#36912951](#))
- A half-star rating should not be able to be set ([#36912897](#))
- Even though a movie cannot be added twice, a notification is still set ([#37252375](#))

Upcoming features

- View all movies with a specific tag
- View IMDb info for an added movie
- The ability to remove tags

DAT255

- Edit tags, rating, notes and release date
- View a movie's tags and release date.
